

Dear Customer

February 3, 2017

Norsk Lastbærer Pool AS has had a pooling and recycling option with plastic pallets since 2010. After six years of operating that pool, the administration and Board have learned more about the costs and operations of such handling. We have experienced that the pattern of pooling has changed in a direction of fewer trips, hence the customers are keeping the pallets for a longer period of time. The consequence is that NLP must invest in more new plastic pallets due to the fact that each pallet generates a lower trip fee. The NLP Board and administration has therefore decided to increase the daily hire of NLP Plastic pallet from NOK 0,16 to NOK 0,173. The change will be in effect from April 1. 2017.

Best Regards
Ragnar Strand
